Emergency Needs Assessment (English)

Emergency Needs Assessment (English)

IFRC

The objective is to empower participants of the online course to initiate and develop an initial/ rapid multi-sectorial assessment. The training will help learners to carry out an 'Emergency Needs Assessment' (ENA).

An ENA provides an understanding of a disaster situation in the first two weeks of an emergency. Participants will work their way through the whole assessment process: from clearly defining the purpose of the assessment, proceeding with the application of appropriate methodologies, to the analysis and dissemination of your findings. This training provides a step-by-step tool with clear recommendations throughout.

As a result of this training, you will: recognize the purpose of assessment in emergencies; identify the main principles of assessment; identify who is on the assessment team; be able to apply the steps of the assessment process within your area; distinguish between primary and secondary data; recognize how to review secondary data; understand how to collect primary data; be able to summarize, compare and interpret data; recognize how to develop a scenario; understand how to report and disseminate your findings.

Online Course - 1 Hours 0 Minutes

This online learning was completed by Carles Lara Llaó on 11 November 2023.
