Carles Lara Llaó

for the successful completion of the course

**Public Health - Module 4: Household Water Treatment and Safe Storage
(English)**

Public Health - Module 4: Household Water Treatment and Safe Storage (English)

IFRC

In this module, you will learn about how to work with communities to treat their household water and keep their treated water clean. Once you have a basic understanding of key concepts, you will apply this knowledge to analyze, reflect, and act on situations from a fictional, yet realistic flooding disaster in a country called Mandawi.

At the completion of this module, you will be able to:

Involve the community in testing their water, treating their water, and then keeping their water clean through safe water storage and good hygiene habits

Determine if water is contaminated

Choose the most appropriate method for treating water in a scenario

Train the community how to use water treatment methods

Establish safe storage and hygiene programs

Monitor the effectiveness of these activities

Online Class - 0 Hours 30 Minutes

This online learning was completed by Carles Lara Llaó on Sunday, 29 June 2025.
