- **Message Hyperlink**

uh... I guess that whole message I just typed disappeared ... take 2 ((just realized it was removed for profanity. valid.))

I did a search and I was wrong - I was thinking of your response to those ridiculous photographs I posted of myself using The Keyboard with The Cellular. <https://discord.com/channels/836622115435184162/837345928943239198/888427911957340181>

basically, my entire 2021 has been **documenting the (ongoing, usually unacknowledged entirely) differences in Bluetooth keyboard support between iOS (iPhone) and iPadOS.** <https://uikeycommand.neocities.org>

I started by just asking Apple to do so and they responded (more or less) with "pee off."

((I really just want to *aggregate* the the topic, if that makes sense. I've *happened upon* so many spinning wheels since iOS 4.1 and think collectivizing the knowledge might help.)) [#keys](#)
