Currently, if I wanna merge a few items in a list, I have to select and then 'Edit' them.

But this option doesn't remove all of the selected items and create a unified one.

Following command adds "Merge" into menu/toolbar and shortcut to do the merge + deletion of selected items ([here is how to add the command to CopyQ](#)).

```
[Command]
Command="
    copyq:
    add(input())"
Icon=\xf022
InMenu=true
Input=text/plain
Name=Merge and Delete
Remove=true
Shortcut=ctrl+shift+m
```

@hluk Nice, but add it as a default option to CopyQ, as it's really useful.

@hluk Nice, but add it as a default option to CopyQ, as it's really useful.

What do you mean by default option exactly?

lyndalopez544 commented on Aug 17, 2019

What do you mean by default option exactly?

Simply being available by default, just like the other options in the copyq menu.

CopyQ : Merge Clipboard items #1321

✓ Closed

Clemens-Ratte-Polle commented on Mar 20, 2020

Very useful for Copy&Paste :D

But merging Items can not be undone per CTRL+Z. :(

Perhaps Undo more global? :)

Perhaps Undo more global? :)

CopyQ doesn't support Undo out of the box. You would need to create a command for that.
