

Chub Inference API

0.2.2OAS3

[openapi.json](#)

Endpoints for Chub inference. Duplicate endpoints exist for compatibility with OpenAI UIs with hardcoded model selection, i.e., if your UI does not fetch the model list from /models for the model selection drop-down, simply use the relevant path as the proxy endpoint.

Authorize

Mimic Endpoints for the OpenAI Mimic API.

POST	/chub/{model}/v1/chat/completions	OpenAI Mimic API endpoint for chat completions. Model selection will be ignored and overridden with the one from the path.	⌵	 
GET	/chub/{model}/v1/models	Fetch the list of available models. Will only return the path's model.	⌵	
POST	/v1/chat/completions	OpenAI Mimic API endpoint for chat completions (Model ambiguous, Must be one in model list for this endpoint).	⌵	
GET	/v1/models	Fetch the list of all available models.	⌵	
POST	/v1/{model}/chat/completions	OpenAI Mimic API endpoint for chat completions. Model selection will be ignored and overridden with the one from the path.	⌵	
GET	/v1/{model}/models	Fetch the list of available models. Will only return the path's model.	⌵	

Raw Endpoints for raw inference with a prompt string, bypassing the OpenAI mimic.

POST	/prompt	API endpoint for generic completions.	⌵	
------	---------	---------------------------------------	---	---

Deprecated Endpoints from V1 that are no longer relevant.

POST	/chub/asha/v1/mars	Old API endpoint for chat completions. Deprecated.	⌵	
------	--------------------	--	---	---
